

# LESPEDEZA WEED CONTROL

Tim R. Murphy, Extension Agronomist-Weed Science

USE STAGE/ AND HERBICIDE	BROADCAST RATE/ACRE		REMARKS AND PRECAUTIONS
	AMOUNT OF FORMULATION	POUNDS ACTIVE INGREDIENT	
<b>PREPLANT INCORPORATED</b>			
EPTC (Eptam) 7 lbs./gal.	3.5 pts.	3.1	For winter annual grass and some broadleaf weed control, incorporate 2 to 3 inches deep before planting for control of annual grass and broadleaf weeds. Do not use if a grass or grain crop is to be planted with the lespedeza.
<b>POSTEMERGENCE - DORMANT APPLICATIONS</b>			
paraquat (Gramoxone Inteon) 2.0 lbs./gal.	1.0 - 2.0 pts.	0.25 - 0.5	Apply during winter months when lespedeza is dormant. Controls Italian ryegrass, common chickweed and most other winter annual broadleaf weeds. Applications to lespedeza that is not dormant may result in stand and/or yield reductions. Add a nonionic surfactant at 1.0 pt./100 gallons of spray solution. <b>DO NOT</b> graze or cut for hay within 60 days of application. Make only one application per season.
