

Wetland Ecology Lab (ECOL/ENTO/PBIO 8150L, 1 credit)

An optional field-oriented course on wetland ecology (not a requirement for 8150), with trips to Sapelo Island salt and freshwater marshes, Okefenokee Swamp, Carolina bays, bottomland hardwood swamps, wildlife marshes, and other wetlands. Students must be able to attend over one weekend and spring break, and must have already taken a wetland ecology class (or be registered for 8150).

Multiple instructors. Limit 10 people. Time arranged.
